

## Comments at Community Service building Ribbon cutting

I am very proud of this new building and the positive work environment it provides for the employees working here. This facility allows the citizens of the county to visit one location and receive several services while at the location. During these difficult times many agencies are being consolidated in other counties for example the recent decision on our VDOT residency is a good example of this consolidation. This new facility represents a long term commitment by the state and county to retain these valuable agencies in a most location accessible to the citizens of the county and keep them located in Tazewell.
