

TAKE NOTICE

Due to improvements made in September 2025 to the storm water drainage system on US 460 Business in the Town of Richlands, Tazewell County may now make improvements to the drainage system on the Richlands Elementary School Campus to prevent additional flooding in the school. If the County were to proceed according to its regular procurement methods the improvements likely would not occur until Spring of 2026 and the Elementary School may flood again this winter. Therefore, the Board of Supervisors authorized procurement of the improvements on an emergency basis by obtaining four written quotes rather than advertisements and sealed bidding, provided the contract does not exceed \$100,000, and authorized the Administrator to proceed with the contractor submitting the lowest quote, forthwith. This notice is given as required by Section 2.2-4303(F) of the Code of Virginia.

C. Eric Young, County Administrator
